

WEEKLY EQUIPMENT INSPECTIONS

PURPOSE:

- To establish a guideline that allows members and training groups to ensure that all fire line equipment is accounted for and in operating order.

GUIDELINE

- This guideline is multiple parts and was designed to ensure all equipment is in operating order and to increase all members' knowledge of department's small equipment and its location.
- Training groups are expected to have their assigned equipment and apparatus inspections completed by the end of drill each week – inspection can be completed any time during the preceding week and self initiative is encouraged

FIRST and THIRD Tuesday nights of the month

- All SCBA and Spare air cylinders will be inspected as per manufacturer recommendation and necessary sheets will be filled out and given to 2703 or his/her designee

SECOND Tuesday night of the month

- Assigned apparatus small equipment and EMS equipment
- Irons Cleaned and Oiled if needed
- Complete Apparatus inventory

FOURTH Tuesday night of the month

- Ensure apparatus is washed
- Cab and windows clean
