

LIVE FIRE TRAINING GUIDELINE

Purpose:

- To establish a guideline to be used by members of the department when using an acquired structure for training including live fire.

Guideline:

- It is the policy of this department to follow the guideline put forth by the NFPA in guide 1403
- All acquired structures should be inspected by a minimum of two chief officers before accepting the structure for training.
 - Inspection should involve
 - Structural Integrity
 - Potential Hazardous Materials
 - Wells or Septic Tanks
 - Utilities
- If structure is to be used for live fire a third party inspection must be completed related to asbestos
- Ensure Live Fire Owner Checklist has been completed
- **NO LIVE VICTIMS WILL BE USED DURING LIVE FIRE TRAINING**
- **NO MEMBERS WILL OPERATE ABOVE AN UNCONTROLLED FIRE**
- Prior to fire operations the building will be vented and laddered as needed for life safety
- Only class a materials will be burned
- No gasoline or Diesel fuel will be used
- No fire will be lit until all parts of the Live Fire Checklist have been met.
